**PHASE I ENVIRONMENTAL SITE ASSESSMENT**

252 GRAND STREET  
WESTBURY, NEW YORK 11590  
SECTION 11, BLOCK 503, LOT 47

**FEBRUARY 2008****1.0 SUMMARY**

As requested by the Town of North Hempstead, Holzmacher, McLendon and Murrell, P.C. (H2M) conducted a Phase I Environmental Site Assessment (ESA) of the Grand Street School located at 252 Grand Street, Westbury, New York (hereafter termed the "subject property"). The subject property has been owned by New Cassel United Community Center, Inc. since approximately 1978. The Phase I ESA was performed in accordance with the guidelines established in the American Society for Testing Materials (ASTM) E1527-05, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process."

The subject property is rectangular in shape and encompasses the tax lot designated as Section 11, Block 503, Lot 47. Nassau County Tax Map records identify the tax lot with the street address 252 Grand Street and show the property area to be approximately 2.5 acres in size. A site location map is included as Figure 1. A tax map for the subject property is included as Figure 2.

Ms. Caroline A. Cadalso, Senior Project Scientist from H2M, performed a site inspection on January 25, 2008. As part of the environmental site assessment process, an environmental database regulatory file search was obtained and reviewed for the subject property. In order to obtain additional information relative to the subject property, requests were made to the New York State Department of Environmental Conservation (NYSDEC), Town of North Hempstead (TONH), and the Nassau County Department of Health Services (NCDH) through the Freedom of Information Law (FOIL). Historic Sanborn fire insurance maps, aerial photographs, city directories, environmental lien search reports, and topographic maps were searched and/or reviewed for the subject area to determine if any recognizable environmental conditions were present at the subject property.

The Phase I Environmental Site Assessment identified two recognized environmental conditions (RECs) associated with the subject property as follows:

- On-site unregistered underground heating oil tank of an unknown capacity;

- Potential soil vapor and groundwater contamination due to off-site sources.

It is recommended that a Phase II ESA be conducted at the subject property to determine if the above RECs have impacted the environmental quality of the subject property. A detailed scope of work and cost estimate will be provided under separate cover.

Furthermore, due to the age of the building (the main portion reportedly having been constructed in 1927 with an addition in 1956), asbestos and/or lead-based paint may be present. The mere presence of asbestos-containing material and/or lead-based paint is not typically considered a hazard unless the materials are in poor condition, or the areas are being considered for demolition. Should the building be considered for demolition or renovation, in whole or in part, it would be advisable to conduct surveys for these materials, and to manage any confirmed asbestos and/or lead in accordance with applicable regulations and guidance.

## **2.0 INTRODUCTION**

### **2.1 Purpose**

This Phase I Environmental Site Assessment has been performed to establish the general environmental quality of the subject property and to identify actual or potential environmental liabilities.

### **2.2 Detailed Scope-of-Services**

The scope-of-services for this Phase I ESA included the following tasks:

1. Review of site plans, surveys and tax map information for the subject property, as available.
2. Site visit to inspect the subject property and identify/confirm existing land use, water supply and sewage disposal, possible waste disposal areas, drainage patterns, buried and aboveground tanks, hazardous materials and petroleum usage, electrical transformers, and neighboring land uses. This task included interviews with site occupants and/or site managers.
3. Examination of reasonably ascertainable, standard Federal and State sources to determine the environmental history of the subject property and neighboring properties within a minimum search distance of approximately one (1) mile. This task included review of historical and neighboring property information provided in an environmental database service search report.

4. Review of local regulatory agency files regarding the environmental compliance history of the subject property. This would include files at the New York State Department of Environmental Conservation (NYSDEC), Nassau County Department of Health (NCDH) and the Town of North Hempstead (TONH).
5. Review of reasonably ascertainable, standard historical sources (aerial photographs, fire insurance maps, topographic maps, etc.), as available, to determine historical land use at the subject property and immediately adjacent properties.
6. Preparation of a Phase I Environmental Site Assessment Report summarizing the results of the findings regarding tasks (1) through (5). The report presents the conclusions as to the general environmental quality of the property and summarizes any additional potential environmental liabilities associated with the site.

### **2.3 Significant Assumptions**

The Phase I Environmental Site Assessment and report are limited by the availability of information at the time of the assessment.

### **2.4 Limitations and Exceptions**

This report has been prepared for the Town of North Hempstead.

### **2.5 Special Terms and Conditions**

This report is the summary effort of work performed to fulfill the requirements set forth in ASTM E1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. ASTM Practice E1527-05 are intended to permit a user to satisfy one of the requirements to qualify for the "innocent landowner" defense as defined under the Federal Comprehensive Environmental Response Compensation and Liability Act (CERCLA).

### **2.6 User Reliance**

This Environmental Site Assessment document has been prepared on behalf of the Town of North Hempstead.

### **3.0 SITE DESCRIPTION**

#### **3.1 Location and Legal Description**

The subject property is located at 252 Grand Street, Westbury, New York, 11590, and is currently owned by New Cassel United Community Center, Inc. The tax identification number for this property is Section 11, Block 503, Lot 47. This parcel is rectangular in shape and is located on the northeast corner of Grand Street and Broadway in Westbury, New York.

Coordinates:

Latitude (North): 40.760500 - 40° 45' 37.8"

Longitude (West): 73.590750 - 73° 34' 8.4"

Universal Transverse Mercator: Zone 18

UTM X (Meters): 620789.0

UTM Y (Meters): 4512944.5

Elevation: 125 feet above sea level

#### **3.2 Site and Vicinity General Characteristics**

The property is developed with a two-story building that was originally occupied by a school but is currently vacant. The subject property is bordered on the south by Broadway followed by dwellings, on the north by a dwelling, on the east by a senior citizens facility, and the west by Grand Street followed by dwellings. The topography at the subject property is generally flat. Land uses beyond the noted adjacent properties in the general vicinity include primarily residential/commercial properties.

#### **3.3 Current Use of the Property**

The subject property is currently vacant. Most recent occupancy reportedly included the New Cassel Community Center, a daycare facility, and Alcoholics Anonymous.

#### **3.4 Description of Structures, Roads, Other Improvements in the Site**

A majority of the subject property is paved with asphalt although there are grassy areas. .

Additional information relative to the description of the subject property is included in Section 6.3 of this report.

### **3.5 Utilities**

According to information obtained during the site inspection, natural gas, potable water, electricity and telephone services were formerly provided to the subject property by public utilities. Sanitary waste was managed by the municipal sewer system according to the Nassau County Department of Public Works. One solid cover manhole is present within the front parking lot. The purpose of this manhole is unknown, but is suspected of being associated with the municipal sewer connection. No drywells or drains were observed on the subject property. Storm water from the subject property is anticipated to discharge into nearby catch basins located along Grand Street.

### **3.6 Current Uses of the Adjoining Properties**

The subject property is bordered on the south by Broadway followed by dwellings, on the north by a dwelling, on the east by a senior citizens facility, and the west by Grand Street followed by dwellings.

## **4.0 USER PROVIDED INFORMATION**

The information presented in this section was provided by the current property owner, property manager, purchaser, and/or lending institution as noted below.

### **4.1 Title Records**

No relative information was provided regarding title records for the subject property.

### **4.2 Environmental Liens or Activity and Use Limitations**

The environmental lien report (Appendix A) did not indicate any environmental liens or activity and use limitations for the subject property.

### **4.3 Specialized Knowledge**

No specialized knowledge was provided regarding the subject property.

### **4.4 Valuation Reduction for Environmental Issues**

No information was provided regarding knowledge of the lease or purchase price of the property or valuation reduction of the subject property due to environmental issues.

#### **4.5 Owner, Property Manager and Occupant Information**

Owner(s), property managers and/or occupants of the subject property were interviewed for the purpose of identifying past and present environmental issues associated with the property. All parties that were interviewed are identified in Section 7.0 of this report.

#### **4.6 Reason for Performing Phase I**

This report presents the findings and recommendations of the Phase I ESA that was performed to advise the Town of North Hempstead of potential environmental liabilities associated with the subject property, if any. The Phase I ESA is intended to identify obvious and/or potential sources of environmental concern, what extent these sources are likely to impact the site and adjacent sites, and assess whether further investigations and/or remedial activities are warranted.

### **5.0 RECORD REVIEW**

A record review was performed to help identify recognized environmental conditions in connection with the subject property. This section will address all records reviewed as part of the Phase I ESA.

#### **5.1 Fire Insurance Map Review**

Three Sanborn fire insurance maps were available for review, from the years 1920, 1929, 1941, and 1968. The Sanborn map report is included in Appendix B.

The 1920 map shows the subject property as a vacant land. The surrounding area is scarcely developed with residential dwellings.

The 1929 map shows a one to two-story building on the subject property identified as "Grade School No. 3." The building was constructed in 1926, and is described as heated by steam and as having electrical service. There is increased residential development in the surrounding area.

No changes are noted to the subject property in the 1948 map. There is increased residential development in the surrounding area.

The 1968 map shows that a two-story addition to the southern portion of the school building was constructed in 1952. There is increased development in the surrounding area.

Review of the Sanborn fire insurance maps revealed no potential environmental concerns for the subject property.

### **5.2 Aerial Photograph Review**

Aerial photographs for the subject property and surrounding areas were reviewed for the years 1957, 1966, 1974, 1980 and 1994. Copies of the aerial photographs are included in Appendix C.

The photograph from 1957 shows the subject property as having been developed with the current site building. The surrounding properties have been developed for apparent residential uses with commercial/industrial uses further south and east of the subject property.

The photographs from 1966 through 1980 shows no apparent change to the subject property from 1957. Surrounding properties continue to be developed or expanded.

The photograph from 1994 shows no changes to the subject property or surrounding area with the exception of the presence of a large, irregular shaped building directly east of the subject property, its shape and configuration suggestive of an institutional use.

Review of the aerial photographs revealed no potential environmental concerns at the subject property.

### **5.3 Topographic Map Review**

Historic topographic maps for the subject property and surrounding areas from 1900, 1918, 1947, 1967 and 1979 were reviewed. These maps are included in Appendix D. The topographic map for 1900 comprises the Oyster Bay Quadrangle, series 15. The map for 1918 comprises the Camp Mills Quadrangle, series 15. The maps for 1947, 1967 and 1979 comprise the Hicksville Quadrangle, series 7.5. The general vicinity of the subject property can be identified in the topographic maps. The Westbury Grade School building is shown on the subject property in the 1947 through 1979 maps. No buildings are depicted on the subject property or surrounding area in both the 1900 and 1918 maps. The elevation at the subject property remains at approximately 125 feet above mean sea level (msl). No adverse environmental conditions were identified on the topographic maps.

#### **5.4 City Directory**

Environmental Data Resources, Inc. (EDR) provided copies of City Directories for the subject property. The city directory assists in determining past uses and occupants for a target property and surrounding properties from 1972 through 2000. According to the city directory, in 1995 and 2000 the subject property was occupied by the New Cassel Community Center. The subject property address was not listed from 1972 through 1990 and in 2007. The occupants of surrounding properties that were listed in all directories appear to be primarily of a residential/commercial nature. A complete copy of the city directory for the subject property is provided in Appendix E.

#### **5.5 Environmental Database Regulatory File Review**

EDR was also contracted to prepare a regulatory agency file review report to provide a summary of reasonably ascertainable, standard Federal and State environmental information sources. A complete copy of the EDR report is provided in Appendix F. At least one nearby facility was identified on each of the following sources reviewed by EDR:

- RCRA Corrective Action (CORRACTS)
- RCRA Information (RCRA Info)
- U.S. Brownfields
- New York State Inactive Hazardous Waste Disposal Sites (SHWS) and Deleted State Hazardous Waste Sites (DEL SHWS)
- New York State Solid Waste Facility/Landfill Site Registry (SWF/LF)
- New York State Leaking Storage Tank Incident Reports (LTANKS) and Historic Leaking Storage Tanks (HIST LTANKS)
- Underground Storage Tanks (UST)
- Aboveground Storage Tanks (AST)
- Major USTs (MOSF)
- New York State Hazardous Waste Generators (MANIFEST)
- New York State Spills (SPILLS)
- Sites with engineering controls in place (ENG CONTROLS)
- Sites with institutional controls in place (INST CONTROLS)

##### **5.5.1 Subject Property**

The subject property is not listed in any of the databases searched by EDR.

### 5.5.2 Neighboring Properties

The normal operating activities conducted by the neighboring occupants are routinely examined to determine whether the subject property could potentially be impacted. The EDR report lists neighboring sites in the vicinity of the subject property in the databases listed above. In addition, 20 unmapped (orphan) sites were identified. A summary of the sites and definitions of the database acronyms follows.

#### 5.5.2.1 CORRACTS

This database includes waste handlers with RCRA corrective action activity. Two such sites, Dionics Incorporated and Vishay General Semiconductor LLC, were identified within one mile of the target property. Since these sites are not upgradient of the subject property, there is a low probability that they will impact the subject property.

#### 5.5.2.2 RCRA Info

RCRA Info is the USEPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. Large quantity generators are defined as those who generate at least 1,000 kilograms (kg) of hazardous waste per month. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. No RCRA-LQG sites are listed within 0.25 mile of the subject property. One RCRA-SQG site is listed within 0.25 mile of the subject property. This site is not upgradient of the subject property. As a result, there is a low probability that this site will impact the subject property.

#### 5.5.2.3 U.S. BROWNFIELDS

This database is a list of Brownfields properties. One such property is listed in the database and is upgradient of the subject property. As a result, the possibility exists for impacts to groundwater from this site that could potentially adversely affect groundwater quality at the subject property.

#### 5.5.2.4 SHWS and DEL SHWS

New York State Superfund sites are listed in the SHWS database. Those that have

been delisted are included in the DEL SHWS database. There are eleven SHWS sites and two DEL SHWS site within one mile of the subject property. None of these sites are located upgradient of the subject property and, as a result, there is a low probability that they will impact the subject property.

#### 5.5.2.5 SWF/LF

The Solid Waste Facilities/Landfill Sites (SWF/LF) records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Eight SWF/LF sites are listed within 0.5 mile of the subject property. One of these is located hydraulically downgradient of the subject property. The remaining seven facilities include five active automobile dismantlers, one active transfer station and one inactive transfer station. No violations are reported for any of these sites. A permitted facility does not necessarily indicate an environmental concern.

#### 5.5.2.6 LTANKS and HIST LTANKS

Leaking Storage Tank Incident Reports (LTANKS) contain an inventory of leaking underground or aboveground leaking storage tanks that have been reported to the New York State Department of Environmental Conservation (NYSDEC). Incident reports are filed due to tank test failures, tank failures or tank overfills. The LTANKS report identified 27 sites in the database within 0.5 mile of the subject property. All of these sites have been closed, indicating that any required remediation has been conducted to the satisfaction of the NYSDEC. Based on the information in the database report, there is a low probability that any of these sites will impact the subject property.

HIST LTANKS identifies leaking underground or aboveground storage tanks that were listed in NYSDEC Spills Information Database prior to January 1, 2002. Twenty-six HIST LTANK sites are listed and all are also included in the LTANKS summary above.

#### 5.5.2.7 UST and AST

The Underground Storage Tank (UST) and Above Ground Storage Tank (AST) databases contain registered USTs and ASTs. Three UST sites and six AST sites

were identified within 0.25 mile of the subject property. The presence of registered USTs or ASTs does not necessarily indicate an environmental problem. A leak from any of these tanks would be identified in the LTANKS database.

#### 5.5.2.8 MANIFEST

MANIFEST is a database that tracks hazardous waste from the generator through transporters to a disposal facility. In addition to the subject property, the report identified one site in the database within 0.25 mile of the subject property. This site is not upgradient of the subject property. As a result, there is a low probability that this site will impact the subject property.

#### 5.5.2.9 SPILLS and HIST SPILLS

The SPILLS and HIST SPILLS database includes data collected on petroleum spills since April 1, 1986. The reports identified eleven sites within 0.125 mile of the subject property, all but two of which are closed, indicating that any required remediation has been conducted to the satisfaction of the NYSDEC. The remaining sites are not upgradient of the subject property. As a result, there is a low probability that any of these sites will impact the subject property.

#### 5.5.2.10 ENG CONTROLS

This database lists sites with engineering controls in place, and includes the Former Laka Industries, Inc. site. This site is not upgradient of the subject property. As a result, there is a low probability that it will impact the subject property.

#### 5.5.2.11 INST CONTROLS

This database lists sites with institutional controls in place, and includes the Former Laka Industries, Inc. site. This site is not upgradient of the subject property. As a result, there is a low probability that it will impact the subject property.

#### 5.5.2.12 MOSF

The MOSF database includes petroleum bulk storage facilities with storage capacities of 400,000 gallons or greater. The report identified one such site within 0.25 mile of the subject property. The Mid County Terminal is not upgradient of the subject

property. As a result, there is a low probability that this site will impact the subject property.

#### 5.5.2.13 Unmapped/Orphan Sites

The environmental database search identified a total of 20 unmapped sites in the various environmental databases. These sites generally contain limited information and cannot be precisely located with respect to the subject property. Due to the limited available information, the potential for environmental impacts from these sites to the subject property cannot be completely ascertained. The possibility exists for potential impacts to groundwater from these sites that could potentially adversely affect groundwater quality at the subject property.

### 5.6 Additional Environmental Record Source

Requests were made to the New York State Department of Environmental Conservation (NYSDEC), the Nassau County Department of Health (NCDH) and the Town of North Hempstead (TONH) under the Freedom of Information Law to obtain additional state and local environmental compliance records pertaining to the subject property. All correspondence letters forwarded to regulatory agencies as part of this assessment are provided in Appendix G. At the time of publication of this report, responses to these requests have been received from all regulatory agencies. Neither the NCDH or the NYSDEC have any files for the subject property. The TONH had limited records for the subject property, including plans and an application from 2002 to build a senior housing/day care facility at the subject property.

### 5.7 Physical Setting Source(s)

In accordance with the ASTM E1527-05 standard, a physical setting source was reviewed to assist the environmental professional. A physical setting source was provided as an addendum to the environmental database search report. The terrain is situated at approximately 125 feet above mean sea level (msl) with a topographic gradient in the general southeasterly direction, based on the United States Geological Survey (USGS) 7.5-minute quadrangle maps. Groundwater flow in the vicinity of the subject property is expected to be in a southeasterly direction.

**5.8 Historical Use Limitation on the Property and Adjoining Properties**

Information was not available regarding historical limitations for the subject property and adjoining properties.

**5.9 Data Gaps**

No data gaps were identified in this Phase I ESA with the exception that the basement kitchen was locked and therefore inaccessible.

**6.0 SITE RECONNAISSANCE****6.1 Methodology and Limiting Conditions**

The scope of work defined for this project included an on-site inspection and general site characterization. The information obtained during the site inspection and present herein is a result of observations obtained during the inspection.

**6.2 General Site Setting**

The subject property is situated in an area of primarily commercial/residential usage in a suburban setting. Industrial properties are located further south of the subject property. Photographs taken during the site inspection are provided in Appendix H.

**6.3 Interior Observations**

The first floor contains an auditorium, a kitchen, a maintenance room with a slop sink, several offices, and several classrooms. The second floor contains several classrooms and bathrooms. The first and second floors are in significantly poor condition likely due to vandalism. The floors are predominantly vinyl tile and the walls are painted plaster or wood paneling. The ceilings consist predominantly of various types of acoustic tile. Furniture, miscellaneous school equipment and computers were observed in disarray.

The building has two partial basements located on the north and south sides. The south basement contained a kitchen and a meeting room. The south basement consists of painted concrete floors, walls and ceilings with fluorescent light fixtures. The north basement consists of the boiler room and is unfinished. A sump pump was observed in the boiler room. The floor was in fair condition with no evidence of spillage.

No floor drains were observed in the basément or kitchen areas. Heat for the building was formerly provided by two oil-fired boilers, and the heat was distributed through steam radiators. The kitchen was formerly heated by an oil-fired space heater. Hot water for building use was provided by an oil-fired hot water heater located in a utility room near the kitchen.

#### **6.4 Exterior Observations**

The exterior of the two-story building is constructed of brick. The main entrance to the building is located along the western exterior wall, facing Grand Street. Additional entrances are located along the northern, southern, and eastern exterior walls of the building. An overhead door leading to a storage room was observed on the north side of the building. Furniture and three five-gallon containers of a machine wash detergent were observed in the garage.

The remainder of the subject property is mostly covered by asphalt, with a grass and landscaped area located in the front of the building and on the south side. An asphalt parking area is located along the north side of the building. No staining of the asphalt was observed at the property. A playground was located at the southern portion of the subject property. One solid cover manhole was identified in the front parking lot. A fill port and solid cover manhole were observed on the north side of the subject property beneath asphalt pavement. The size of the UST is unknown although it reportedly stored heating oil. No areas of stressed vegetation were observed on the subject property.

The perimeter of the subject property is marked with chain link fencing. An apparently empty and unlabeled 55-gallon drum with an open top was observed along the northern perimeter of the subject property.

#### **7.0 INTERVIEWS**

Mr. Fred Mekas, representative of the New Cassel Community Center, was interviewed at the subject property and answered questions relative to past and recent site operations. According to Mr. Mekas, other former occupants included a senior citizens center, Trail Blazers Day Care, and Alcoholics Anonymous. When asked if he knew of any possible environmental issue relative to the property, he

stated that he was unaware of any. Mr. Mekas was not aware of the size of the heating oil UST but believed it to be empty at the time of the site visit.

## **8.0 FINDINGS AND OPINION**

Upon completion of this Phase I Environmental Site Assessment, the environmental professionals identified two RECs associated with the subject property as follows:

- On-site unregistered underground heating oil tank of an unknown capacity;
- Potential soil vapor and groundwater contamination due to off-site sources.

It is recommended that a Phase II ESA be conducted at the subject property to determine if the above RECs have impacted the environmental quality of the subject property. A detailed scope of work and cost estimate will be provided under separate cover.

Furthermore, due to the age of the building (the main portion reportedly having been constructed in 1927 with an addition in 1956), asbestos and/or lead-based paint may be present. The mere presence of asbestos-containing material and/or lead-based paint is not typically considered a hazard unless the materials are in poor condition, or the areas are being considered for demolition. Should the building be considered for demolition or renovation, in whole or in part, it would be advisable to conduct surveys for these materials, and to manage any confirmed asbestos and/or lead in accordance with applicable regulations and guidance.

## **9.0 DEVIATIONS**

This Phase I ESA report was prepared consistent with the ASTM E1527-05 standards. No deviations exist.

## EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report includes results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers follows established procedures to:

- search for parcel information, legal description, and ownership based on client supplied address information;
- research indexes and title repositories;
- obtain a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument (title, parties involved, and description); and
- provide a copy of the deed.

*Thank you for your business.*  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

**EDR Environmental LienSearch™ Report**

**EXHIBIT A**

THIS INDENTURE, made the 24th day of February, nineteen hundred and seventy eight, between the TOWN OF NORTH HEMPSTEAD, a municipal corporation organized and existing under the Laws of the State of New York with offices at 220 Plandome Road, Manhasset, New York, as Recipient and Grantee under the provisions of 42 U.S.C. §5801 (Public Law 93-363, Title 1), party of the first part, and the NEW CASSEL UNITED COMMUNITY CENTER, INC., a non-for-profit corporation with offices at Grand Street and Broadway, New Cassel, Westbury, New York, party of the second part.

WITNESSETH, that the party of the first part, in consideration of ten dollars paid by the party of the second part, does hereby remise, release and quitclaim unto the party of the second part, the heirs or successors and assigns of the party of the second party forever,

ALL that certain plot, piece or parcel of land, with buildings and improvements thereon erected, situate, lying and being at New Cassel, in the Town of North Hempstead, County of Nassau and State of New York, known and designated as and by Lot Numbers 23 to 28, inclusive, in Block 22 on a certain map entitled "2nd Map of the City of New Cassel" situated at New Cassel, filed in Queens County April 22, 1892 as Map No. 256, and also on the "Map of the City of New Cassel" filed in Queens County June 20, 1871 as Map No. 40 and filed in Nassau County November 26, 1937 as Map No. 392, which said lots when taken together are more particularly described as follows:

BEGINNING at a point which is the intersection of the northerly side of Broadway with the easterly side of Grand Street as shown on said map;

running thence northerly along the easterly side of Grand Street a distance of 550.00 feet to the division line between lots 22 and 23;

running thence easterly, at right angles to Grand Street, along the division line between lots 22 and 23 and lots 26 and 27, a distance of 200.00 feet to the westerly side of Magnolia Avenue as shown on said map;

running thence southerly along the westerly side of Magnolia Avenue as shown on said map, which portion of Magnolia Avenue is not open or in use as a street, a distance of 550.00 feet to the northerly side of Broadway;

running thence along the northerly side of Broadway a distance of 200.00 feet to the point or place of beginning, containing within said bounds 110,000 square feet more or less, as shown on Survey prepared by

692

Block 22 Lot 26

A. James de Bruin, P.E. & L. S., North Bellmore, New York, dated August 4, 1977, Drawing Number L-4486, subject to such covenants, restrictions or easements which may run with the land.

Being shown on the Nassau County Land and Tax Map in Section 11, Block 22 as Lot 126.

Said premises being the same conveyed to Grantor from U.S.F.D. # 1, (Westbury) Town of North Hempstead, Nassau County, New York by deed of even date herewith.

Said premises are conveyed and received upon the condition that no subsequent disposition or sale thereof shall be valid without the written consent of the Attorney General of the State of New York, or such other appropriate Public Official, as to such sale or disposition,

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 19 of the Lien Law, hereby covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "Parties" whenever the sense of this indenture so requires.

...of the first ...  
...written.

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

## SUMMARY

- *City Directories:*

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1972 through 2007. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

GRAND STREET  
NASSAU, NY 11590

#### COORDINATES

Latitude (North): 40.760500 - 40° 45' 37.8"  
Longitude (West): 73.569000 - 73° 34' 8.4"  
Universal Transverse Mercator: Zone 18  
UTM X (Meters): 620789.0  
UTM Y (Meters): 4512944.5  
Elevation: 125 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 40073-G5 HICKSVILLE, NY  
Most Recent Revision: 1979  
  
South Map: 40073-F5 FREEPORT, NY  
Most Recent Revision: 1979

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## EXECUTIVE SUMMARY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### FEDERAL RECORDS

**CORRACTS:** CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/26/2007 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<b><i>DIONICS INCORPORATED</i></b>	<b><i>65 RUSHMORE ST</i></b>	<b><i>1/4 - 1/2 SE</i></b>	<b><i>51</i></b>	<b><i>128</i></b>
<b><i>VISHAY GENERAL SEMICONDUCTOR L</i></b>	<b><i>172 SPRUCE ST</i></b>	<b><i>1/2 - 1 WSW</i></b>	<b><i>77</i></b>	<b><i>229</i></b>

**RCRAInfo:** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act ( RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/13/2006 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

### STATE AND LOCAL RECORDS

**SHWS:** The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, and dated 08/15/2007 has revealed that there are 11 SHWS sites within approximately 1 mile of the target property.

**HIST LTANKS:** A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 26 HIST LTANKS sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

**UST:** The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the UST list, as provided by EDR, and dated 10/02/2007 has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
E-Z-EM, INC.	117 MAGNOLIA AVE	1/8 - 1/4 SSE	G24	39

**MOSF UST:** Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 MOSF UST site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

**SPILLS:** Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 10/02/2007 has revealed that there are 11 NY Spills sites within approximately 0.125 miles of the target property.

**HIST SPILLS:** This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 7 NY Hist Spills sites within approximately 0.125 miles of the target property.

 Resource Affected: Soil  
 Oxygenate: False  
 DEC Memo: Start CallerRemark - 0303697 UPON EXCAVATION OF A 4,000 GALLON TANK SOIL CONTAMINATION WAS DISCOVERED. TANK APPEARS TO BE LEAKING-TANK COULD NOT BE REMOVED DUE TO GAS LINES ON TOP OF IT-ARRANGEMENTS TO BE MADE WITH LIPA TO HAVE TANK REMOVED. ENDCallerRemark - 0303697  
 Remarks: Start DECRemark - 0303697 Prior to Sept, 2004 data translation this spill Lead DEC Field was "BRIAN D" 7/9/03 TELECON TO JOE PARISI. ESI- SITE IS ON NORTH SIDE OF MIDDLE COUNTRY ROAD ACROSS FROM TOYOTA, WAS ON SITE TO REMOVE WHAT WAS THOUGHT TO BE A1K GAS TANK, AFTER EXCAVATING TANK FOUND TO BE A 4K GAS TANK, SITE IS AN OLD FORMER GAS STATION, PROPERTY HAS BEEN SUBDIVIDED AND AN ACCESS ROAD NOW COVERS 1/2 OF THE TANK. A 2" GAS MAIN, 3 PHASE ELECTRIC PHONE LINES AND ROADWAY ELECTRIC LINES ARE UNDER THE CONCRETE. SIDEWALK APPROX 6" ABOVE THE TANK CONTAMINATED SOIL WAS ENCOUNTERED BELOW THE TANK, SOIL WAS EXCAVATED BUT WAS PLACED BACK IN THE EXCAVATION AND COVERED WITH PLASTIC. BACKFILL COULD NOT BE BROUGHT TO THE SITE IN TIME AND EXCAVATION COULD NOT BE LEFT OPEN BECAUSE IT IS TOO CLOSE TO THE ROAD. TANK HAS BEEN CUT AND CLEANED TO BE ABANDON IN PLACE,CONTAMINATED SOIL TO BE EXCAVATED AND SOIL BORINGS ADVANCED AROUND THE TANK 88 TONS OF CONTAMINATED SOIL EXCAVATED AND PROPERLY DISPOSED BY ESI, SUBSURFACE INVESTIGATION PERFORMED SOIL AND G/W SAMPLES OBTAINED, TANK ABANDON IN PLACE END DECRemark - 0303697

FINDS:

Other Pertinent Environmental Activity Identified at Site

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).  
The Department of Environmental Protection (NJDEP) manages large  
databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource  
Conservation and Recovery Act (RCRA) program through the tracking of  
events and activities related to facilities that generate, transport,  
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA  
program staff to track the notification, permit, compliance, and  
corrective action activities required under RCRA.

DEC Memo: Start CallerRemark - 8808676 OIL DELIVERED TO U-TUBE. CIRCUMSTANCES NOT CLEAR. APT COMPLEX IS 3YRS OLD; OWNED BY TOWN. END CallerRemark - 8808676

Remarks: Start DECRemark - 8808676 Prior to Sept, 2004 data translation this spill Lead  
DEC Field was "HAAS WELL" / / : (UNK DATE)- NOTE RE DELIVERY DATES AND AMOUNTS. SUPPOSEDLY 4371GAL ON 14DEC (SNOWING?) AND 4400GAL ON 16DEC. \*\*\*\*SOMEONE INSTRUCTEDELIVERY\*\*\*\*. / / : \*\*TWO SCAVENGER PUMPS WERE MOVED TO STATE RECOVERY AT SUNOCO OCEANSIDE (8911037 SP )\*\*\*\*. 02/03/89 (A): NASSAU CTY HEALTH REPORTS POSSIBLE PROBLEM- TOWN-OWNED APT COMPLEX OUT OF OIL. JUST HAD DELIVERY. BLDG APPROX 3YRS OLD. WERE NOTIFIED BY BLDG MGR. 02/03/89 (B): DEC (HOFMANN) AND NCHD (P MOUNT) ON SITE- MET MR ROBBIOUS (SUPERINTENDENT). 4400GAL DELIVERED BY ATLANTIC FUELS. FIRST DELIVERY BY THEM? TANK IS A 10K WITH LINER AND U-TUBE (LEAK DETECTION DEVICE- ESSENTIALLY A MONITORING WELL THAT RUNS UNDER A TANK). 02/03/89 (C): \*\*\*UPON CALLING THE TANK INSTALLER, WAS TOLD THIS HAS HAPPENED BEFORE'. NOT CLEAR WHAT WAS MEANT BY THIS, OR EVEN IF THEY MEANT THIS SITE.\*\*\*. 02/03/89 (D): SITE OWNER- NORTH HEMPSTEAD HOUSING AUTHORITY (POND MILL RD GREAT NECK NY 11020 516-627-6433). 02/09/89: NHHA SENDS TANK SPECS. 02/13/89: HOFMANN LETTER TO NHHA- NEED WELLS. IF PRP DOES NOT STEP FORWARD, AS OWNER OF SITE YOU WILL HAVE TO DO SO. 02/13/89: HOFMANN LETTER TO ATLANTIC FUELS MARKETING CORP (135 CHESTNUT RIDGE RD MONTVALE NJ 07645 201-573-0300)- NEED WELLS. DOES NOT GIVE SCENARIO FOR FAILURE TO COMPLY. 02/28/89 (A): ATLANTIC LETTER TO HOFMANN, CC HERBERT PETROLEUM TRANSPORT (92 ENGERT AVE BROOKLYN NY 11222 212-388-9432)- DENY RESPONSIBILITY. CALLS IT "POSSIBLE RELEASE". 02/28/89 (B): FUEL DELIVERIES WERE ACTUALLY MADE BY HERBERT PETROLEUM. GIVES DELIVERIES DATES, AMOUNTS, AND COPIES OF TICKETS BY THEM. 02/28/89 (C): AS PER EARLIER TELECONS- ATLANTIC UNAWARE OF 16DEC SPILL. HERBERT ADMITTED DELIVERY ON THAT DATE, BUT WERE UNAWARE OF PROBLEM. FIRST KNOWLEDGE CAME 19FEB FROM MR BARRET OF MAG GARDENS. 02/28/89 (D): BARRET CLAIMED EITHER OIL WAS NOT DELIVERED OR DELIVERED TO WRONG PIPE. ATLANTIC CONFIRMED DELIVERY; SUGGESTED CHECKING BLDG PLANS TO SEE IF OIL WAS DELIVERED TO WRONG PIPE. 02/28/89 (E): ADVISED BARRET IN WRITING TO ADVISE PROPER AUTHORITIES. 02/28/89 (F): HAS STATEMENT FROM DRIVER- DELIVERED ON 14DEC AND LATER IN THAT WEEK. INDICATES HE WAS TOLD WHERE TO DELIVER BY OFFICIALS OF THE APT COMPLEX. 02/28/89 (G): ALSO SEEMS TO INDICATE THAT WHEN HE MADE SECOND DELIVERY, HE WAS TOLD BY THESE OFFICIALS THAT THE FIRST DELIVERY WENT INTO AN "AIR SHAFT". 02/28/89 (H): DUE TO THIS, CLAIM NEITHER THEY NOR HERBERT LIABLE. CITE 6NYCRR PART 613.3 A- RESPONSIBILITY FOR TRANSFER.

DEC Memo: Start DECRemark - 9825257 Prior to Sept, 2004 data translation this spill Lead  
DEC Field was "HAAS 98-174" 05/07/98: Fenley & Nicol called DEC (Haas) to  
inform him they had found what appeared to be a recent surface spill.  
05/11/98 (A): Received 7May98 letter from F&N- were on site 7May [while  
checking wells for Spill 8808676 here?] and noticed what appeared to be an  
overflow of the tank. 05/11/98 (B): The spill appeared to be of  
"...significant magnitude." The contamination extended at least 1ft below  
grade. Has photos of the area involved (copies enclosed). 05/11/98 (C):  
Took a soil sample from this area, a water sample from well 2 by the  
remediation system, (and a product sample?). As per discussion of 7May, will  
have the product sample identified. 10/07/98: DEC letter to North Hempstead  
Housing Authority- enclose copy of F&N's correspondence. Request cleanup.  
02/22/99 (A): DEC LETTER TO SWEET CLAIMS (IN RESPONSE TO THEIR REQUEST FOR  
INFO CONCERNINGA SPILL ON/ABOUT 17APR98 WHICH RESULTED IN CLAIM CA 565-4864)-

 Updated By: GTBOBERS  
 Site Description:

The 118-130 Swalm Street site is located in the NCIA, an urban portion of Nassau County, NY. The property is mostly occupied by a one story industrial building, with the remainder of the site paved, with the exception of a small grass area on the north end of the site. The current tenant, Liqui-Mark, used and stores large quantities of chemicals. However, these chemicals do not contain PCE or TCE related compounds. An abandoned trench once went through the building and connected to leach pools at the north side of the building. The file review indicates the property was developed in 1961 and was formerly occupied by a mechanical engraving company, a plastics extrusion company, a vitamin manufacturer, and an ink ribbon manufacturer. Based on these types of operations, it is likely that they used products containing PCE and TCE related compounds. Soil samples at the leachpool locations detected target compounds indicating that this was a disposal area. The contamination seemsto be emerging from this site and contaminating downgradient groundwater. The contaminated groundwater is located within an EPA designated sole-source aquifer. Two public water supply wells are located approximately 2,800 feet downgradient of the site. A Consent Order for a Remedial Investigation/Feasibility Study (RI/FS) and a RI/FS workplan was executed in October 1998. Field work was completed in January 1999. The initial RI Report

is complete and a supplemental report was received in May of 2000. The NYSDEC requested that the PRP do one more geoprobe boring on the SW corner of the site and additional investigation of internal drainage structures. The field work was completed in April 2001. Based on the results of the February 2001 field work, additional geoprobe borings are required. The additional field work was completed in 2002. The results indicate decreasing VOC levels, however, levels in groundwater downgradient of the site are still above TAGM levels. A further action ROD was issued for the site in March 2004.

**Environmental Problems:** The primary contaminants of concern at the site known at this time include VOCs, primarily PCE and TCE. Environmental sampling has confirmed that there is a plume of contaminated groundwater migrating away from this site. PCE and TCE in exceedance of SCGs have been found in groundwater at and downgradient of the site. The site is situated within an EPA designated sole-source aquifer and is approximately 2,800 feet upgradient of a public water supply system.

**Health Problems Assessment:** There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards. Remediation of site-related source areas has reduced the level of VOCs in the raw water entering the Bowling Green wells. An air stripper was placed on the wells in 1995 to remove contaminants before water is distributed to customers. Strategies to further protect the impacted downgradient supply wells are yet to be implemented.

 Site Description:

The 299 Main Street site is located in the New Cassel Industrial Area, an urban area of Nassau County, NY. The site is dominated by a large one-story building with several equipment bays. This site was developed sometime between 1950 and 1962 and consists of a garage with a number of bays and office space. To the north of the building is a large fenced storage yard. The property was formerly used as a junkyard and a transportation company. Island Transportation Company (ITC) used TCE to wash asphalt residues from its trucks prior to 1980. A Nassau County Department of Health (NCDOH) inspection in 1978 listed a storage of 2,841 pounds of TCE, and oil saturation at the storage area. The NCDOH in 1979, discovered that ITC was discharging wastewater from its truck cleaning operations into the street. A sample analysis showed that benzene, toluene and aliphatic hydrocarbons were present in this discharge. Sam-Ton Towing and Salvage was cited by USEPA in August 1990 for illegally injecting fluids into the ground via Class V wells at this property. On November 2, 1993 a fire occurred at Sam-Ton and at least seven drums of unknown contents spilled during the fire. Past site operations have contaminated groundwater beneath and downgradient of the site with TCE and related compounds. The contaminated groundwater is located within an EPA designated sole-source aquifer. Two public water supply wells are located approximately 2,700 feet downgradient of the site. A Focused Remedial Investigation has been conducted and the report was received in May of 2000. NYSDEC requested that additional work be performed in an area of the site contaminated with VOCs. The work plan was received on January 15, 2001, was approved on February 8, 2001 and field work was completed in April 2001 in the former solvent storage tank area (area 10). Based on the results of the 2001 field work, the PRP's consultant has prepared an IRM work plan which was approved in May 2002. The implementation of the work plan was delayed due to the PRP's changing of consultants and the PRP's attempts to sell the property. The property was sold in 2005, and a new OOC was signed in January 2006. During 2006, the IRM work plan was implemented, including excavation of contaminated materials, tank removal and AS/SVE system installation.

**Environmental Problems:** The primary contaminants of concern at the site known at this time include TCE and breakdown products. Environmental sampling has confirmed groundwater contamination at and downgradient of this site. TCE breakdown products are known to exceed SCGs in groundwater at and downgradient of the site. The site is situated within an EPA designated sole-source aquifer and is approximately 2,700 feet upgradient of a public water supply system.

**Health Problems Assessment:** There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New

York State drinking water standards. Remediation of site-related source areas has reduced the level of VOCs in the raw water entering the Bowling Green wells. An air stripper was placed on the wells in 1995 to remove contaminants before water is distributed to customers. Strategies to further protect the impacted downgradient supply wells are yet to be implemented.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Classification: SIGNIFICANT THREAT TO THE PUBLIC HEALTH OR ENVIRONMENT - ACTION  
 REQUIRED.  
 Region: 1  
 Acres: .170  
 HW Code: 130043K  
 Record Add: 1999-11-18 12:00:00  
 Record Upd: 2007-06-12 12:16:00  
 Updated By: GTBOBERS  
 Site Description:

This site is located on the east side of Kinkel Street, south of Main Street in the New Cassel Industrial Area. The former occupants LAKA Tools and Stamping and LAKA Industries used trichloroethylene (TCE) as a degreaser. Soil samples collected from an abandoned drywell or cesspool contained extremely high levels of TCE and cis-1,2-dichloroethylene (DCE) and groundwater samples collected at the same locations also contained high levels of both TCE and cis-1,2-DCE. Past site operations have contaminated groundwater beneath and downgradient of the site with high levels of TCE and cis-1,2-DCE. The contaminated groundwater is located within an EPA designated sole-source aquifer. The contaminated plume that is emanating from this site has migrated approximately 700 feet downgradient. Two public water supply wells are located 1,500 feet downgradient of this site. This site has received a State Superfund referral. A standby consultant was authorized to implement a Focused Remedial Investigation and Feasibility Study. The field work was completed in October 1998. The Focused Remedial Investigation dated November 1998 and the Focused Feasibility Study dated May 1999 were presented along with the Proposed Remedial Action Plan (PRAP) for Operable Unit 1 (OU-1) on-site soil and groundwater were presented at a public meeting September 30, 1999. The selected remedy was the excavation and off-site disposal of soil and includes monitoring of on-site groundwater for a period of at least two years. The ROD for OU-1 was issued on February 29, 2000 and a Superfund referral was issued on January 3, 2001. The Remedial Action for OU-1 began on February 18, 2002. The excavation and cleanout of the cesspool and catch basin began on February 19, 2002 and confirmatory samples were collected. The excavation was restored and the final inspection was completed on February 28, 2002. The waste material was removed from the site in March, 2002.

Environmental Problems: Past site operations have contaminated the groundwater within a sole-source aquifer at and downgradient of the site with high levels of Trichloroethylene.

Health Problems Assessment: There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards. Remediation of site-related source areas has reduced the level of VOCs in the raw water entering the Bowling Green wells.

**FORMER LAKA INDUSTRIES, INC. (Continued)**

**S106122240**

An air stripper was placed on the wells in 1995 to remove contaminants before water is distributed to customers. Strategies to further protect the impacted downgradient supply wells are yet to be implemented.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Start CallerRemark - 9110094 STATIONARY TANK TRUCK COLLAPSED & SPILLED 900 GAL ANTIFREEZE ON GROUND & IN STORM DRAINS. DEC ALSO FOUND HYDRAULIC OIL-CONTAM. SOIL AT SCHOOLYARD ADJACENT TO ULTRALENE SITE. SEE ALSO SPILL #92-05598. END CallerRemark -9110094  
Remarks: Start DECRemark - 9110094 Prior to Sept, 2004 data translation this spill Lead  
DEC Field was "PARISH" 12/23/91: A: DEC RECEIVED CALL FROM NCFM (CASE # UNK) WHO REPORTED A 150-GAL. ANTIFREEZE SPILL ON GROUND, ROAD AND IN DRAINAGE. 12/23/91: B: SPILLER IS ULTRALENE PETRO PRODUCTS (CONTACT: CHET CRONIN 516-334-8777). ULTRALENE IS CLEANING UP AND PUMPING OUT DRAINS. 12/23/91: C: DEC (PARISH) AND ECO DIDION ON SITE. A TANK TRUCK TRAILER COLLAPSED CAUSING ITS FRONT COMPARTMENT TO BREACH. COMPARTMENT CONTAINED 900 GAL. NEW ANTIFREEZE AS PER CRONIN. (HAVE PHOTOS & SKETCH.). 12/23/91: D: 2 DUMPSTERS FILLED WITH APPROX. 5 C.Y. ANTIFREEZE-CONTAM. SPEEDI-DRY. PARISH OBSERVED A LARGE STAIN ON ADJACENT SCHOOLYARD PROPERTY AND TOOK SOIL SAMPLE. 12/23/91: E: GENERAL WASTE OIL TRUCK VACUUMED 2032 GAL. LIQUID OUT OF 3 DRAINS. 12/30/91: A: PARISH BROUGHT SOIL SAMPLE TO ETL FOR ANALYSIS. 12/30/91: B: PARISH SENT LETTER TO CRONIN REQUESTING RECEIPTS FROM SPEEDI-DRY DISPOSAL, AND THAT SLUDGE BE REMOVED FROM STORM DRAINS AND STAINED SOIL REMOVED FROM SCHOOLYARD. 12/31/91: DEC RECEIVED CALL FROM RONNIE PAPPAS (ULTRALENE OPERATIONS MGR) WHO SAID THAT SLUDGE WAS CLEANED OUT OF DRAINS AND, AS PER DEC ALBANY, SPEEDI-DRY COULD BE DISPOSED AT REGULAR LANDFILL IF <500 LBS. 01/02/92: PARISH CHECKED DRAINS - UNSURE IF SLUDGE WAS REMOVED BECAUSE WATER WAS ALMOST TO TOP OF BOTH DRAINS. WATER WAS CLEAN. (3 DRAINS AFFECTED AS PER 12/23 SKETCH. WAS 3RD DRAIN CHECKED?). 01/10/92: CRONIN TOLD DEC THAT THE TOWN CLEANED THE DRAINS. 01/24/92: A: PARISH ON SITE. 12 X 16-GAL. DRUMS CONTAINING CONTAMINATED SOIL THAT HAD BEEN DUG UP FROM SCHOOL PROPERTY (12/23 SPILL) WAS STORED ON SKIDS IN ULTRALENE'S YARD. 01/24/92: B: PARISH OBSERVED A NEW STAIN ON THE SCHOOLYARD PROPERTY, 10'X50' AREA - GRASS IS DEAD. 01/24/92: C: PARISH RECEIVED RECEIPT FROM DISPOSAL OF SPEEDI-DRY. 2 YDS. REMOVED FROM SITE BY GENERAL ENVIRON. SERVICES AND DISPOSED AT CPC 1/13/92. 01/24/92: D: DEC RECEIVED ANALYSIS REPORT FROM 12/23 SAMPLE: HYDRAULIC OIL PRESENT; TOTAL PETRO HYDROCARBON = 58230 PPM. 02/24/92: A: DEC RECEIVED LETTER FROM ULTRALENE ALONG W/COPY OF GEN. ENVIRON. SVCES. WORK ORDER LISTING PICKUP & DISPOSAL OF 2 DRUMS OF "ANTIFREEZE"-CONTAM. SOIL (SHOULD BE "HYDRAULIC OIL"-CONTAM. SOIL). 02/24/92: B: PAPPAS REQUESTED A "LETTER OF RELEASE" FOR HAVING COMPLETED THE CLEANUP OF THE "ANTIFREEZE SPILL" OF 12/23/91. 03/11/92: A: PARISH CHECKED SITE. 2 DRAINS IN STREET NOT DRAINING AND HAVE SHEEN ON THEM. 03/11/92: B: 2 LARGE AREAS OF DEAD GRASS STILL EVIDENT ON SCHOOLYARD PROPERTY. TOPSOIL STOCKPILED ON SITE BUT NOT YET SPREAD OUT. 08/14/92: DEC RECEIVED CALL FROM CITIZEN RICHARD GIBNEY (516-997-5145): HE SAW OIL-SOAKED SOIL AT SCHOOLYARD IN APRIL & ASKED SPILLER TO CLEANUP. TO DATE, NO ACTION TAKEN. DEC ASSIGNED SPILL # 92-05598. 09/22/92: PARISH ON SITE AND SAW STAINED SOIL ON SCHOOLYARD PROPERTY, POSSIBLY DUE TO RUNOFF FROM ULTRALENE. 11/13/92: A: PARISH SENT LETTER TO ULTRALENE REQUESTING THEM TO CLEANUP THE SCHOOL PROPERTY. 11/13/92: B: PARISH ALSO REQUESTED THAT PLANS BE SUBMITTED TO DEC & NCHD FOR A CONTAINMENT SYSTEM THAT WILL KEEP SPILLED OIL & CONTAMINATED STORMWATER RUNOFF FROM LEAVING THEIR SITE. 11/24/92: A: DEC RECEIVED LETTER FROM PAPPAS STATING THAT CONTAMINATED SOIL HAS BEEN REMOVED FROM SCHOOLYARD AND STORED IN CONTAINER AWAITING PICKUP. 11/24/92: B: ALSO INCLUDED WAS A DESCRIPTION AND SKETCH OF THEIR PROPOSED RETAINING WALL AND TROUGH. 12/10/92: A: PARISH WROTE TO PAPPAS REQUESTING THAT A PROFESSIONAL ENGINEER INSPECT THE PLANS FOR THE CONTAINMENT SYSTEM AND, ONCE APPROVED, TO FORWARD A COPY TO DEC.

12/23 SAMPLE: HYDRAULIC OIL PRESENT; TOTAL PETRO HYDROCARBON = 58230 PPM.  
02/24/92: A: DEC RECEIVED LETTER FROM ULTRALENE ALONG W/COPY OF GEN. ENVIRON.  
SVCES. WORK ORDER LISTING PICKUP DISPOSAL OF 2 DRUMS OF ANTIFREEZE -CONTAM.  
SOIL SHOULD BE HYDRAULIC OIL -CONTAM. SOIL). 02/24/92: B: PAPPAS  
REQUESTEDA LETTER OF RELEASE FOR HAVING COMPLETED THE CLEANUP OF THE  
ANTIFREEZE SPILL OF 12/23/91. 03/11/92: A: PARISH CHECKED SITE. 2 DRAINS  
IN STREET NOT DRAINING AND HAVE SHEEN ON THEM. 03/11/92: B: 2 LARGE AREAS OF  
DEAD GRASS STILL EVIDENT ONSCHOOLYARD PROPERTY. TOPSOIL STOCKPILED ON SITE BUT  
NOT YET SPREAD OUT. 08/14/92: DEC RECEIVED CALL FROM CITIZEN RICHARD GIBNEY  
516-997-5145): HE SAW OIL-SOAKED SOIL AT SCHOOLYARD IN APRIL ASKED SPILLER TO  
CLEANUP. TO DATE, NO ACTION TAKEN.DEC ASSIGNED SPILL 92-05598. 09/22/92:  
PARISH ON SITE AND SAW STAINED SOIL ON SCHOOLYARD PROPERTY, POSSIBLY DUE TO  
RUNOFF FROM ULTRALENE. 11/13/92: A: PARISH SENT LETTER TO ULTRALENE  
REQUESTING THEM TO CLEANUP THE SCHOOL PROPERTY. 11/13/92:B: PARISH ALSO  
REQUESTED THAT PLANS BE SUBMITTED TO DEC NCHD FOR A CONTAINMENT SYSTEM THAT  
WILL KEEP SPILLED OIL CONTAMINATED STORMWATER RUNOFF FROM LEAVING THEIR SITE.  
11/24/92: A: DEC RECEIVED LETTER FROM PAPPAS STATING THAT CONTAMINATED SOIL  
HAS BEEN REMOVED FROM SCHOOLYARD AND STORED IN CONTAINER AWAITING PICKUP.  
11/24/92: B: ALSO INCLUDED WAS A DESCRIPTION AND SKETCH OF THEIR PROPOSED  
RETAINING WALL AND TROUGH. 12/10/92: A: PARISH WROTE TO PAPPAS REQUESTING  
THAT A PROFESSIONAL ENGINEER INSPECT THE PLANS FOR THE CONTAINMENT SYSTEM AND,  
ONCE APPROVED, TO FORWARD A COPY TO DEC. 12/10/92: B: LETTER ALSO DIRECTED  
ULTRALENE TO EXCAVATE AND STOCKPILE ON PLASTIC ANY CONTAMINATED SOIL FOUND  
DURING INSTALLATION OF THE CONTAINMENT SYSTEM. 09/15/93: DEC TO MAKE FINAL  
INSPECTION AND REVIEW FOR CLOSURE. 10/10/95: This is additional information  
about material spilled from the translation of the old spill file: LUBE OIL,  
ANTIFREEZE.

Remark: STATIONARY TANK TRUCK COLLAPSED SPILLED 900 GAL ANTIFREEZE ON GROUND IN  
STORM DRAINS. DEC ALSO FOUND HYDRAULIC OIL-CONTAM. SOIL AT SCHOOLYARD ADJACENT  
TO ULTRALENE SITE. SEE ALSO SPILL 92-05598.

**Site Description:** This site is located at 567 Main Street in the western part of the NCIA. The site is approximately one acre, with one manufacturing building and a paved parking area covering most of the area. The building was built in 1950, and used as a warehouse for construction vehicles until 1997. In 1997, the property was purchased by Atlas Graphics Inc., which currently operates a photo-engraving manufacturing operation. This operation uses a reported 312 gallons per year of TCE. At the time of its purchase, the building was connected to a cesspool for its sanitary waste disposal. In 1977, there was a documented discharge of approximately 50 gallons of TCE to the cesspool. This site was listed on the Registry as a Class 2 site in 1995. The analytical results for this site indicated that elevated levels of TCE were found on-site in both the soil and groundwater. The ROD for this site, issued in February 2000, selected air sparging/soil vapor extraction (AS/SVE) as the remedy to address the on-site contaminated soil and groundwater. The system was constructed in October 2000 and was operated through November of 2003. A soil vapor intrusion investigation is planned.

**Environmental Problems:** Past site operations contaminated groundwater beneath and downgradient of the site with high levels (exceeding SCGs) of TCE. Contaminated groundwater is within an EPA-designated sole-source aquifer. Contaminants have migrated downgradient of the site. Two public water supply wells are located 1,800 feet southeast of the site. The groundwater contamination downgradient of the NCIA was addressed in the October 2003 Record of Decision. On-site groundwater monitoring for the Atlas Graphics site shows that contaminant levels at the site are similar to upgradient levels as of November 2003.

**Health Problems Assessment:** There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards. Remediation of site-related source areas has reduced the level of VOCs in the raw water entering the Bowling Green wells. An air stripper was placed on the wells in 1995 to remove contaminants before water is distributed to customers. Strategies to further protect the impacted downgradient supply wells are yet to be implemented.

**Site Description:** This site is located at 570 Main St. in the western part of the NCIA. The site is a little over two acres, with one manufacturing building and a paved parking area covering most of the area. The site was occupied by IMC Magnetism Inc. from the early 1950s until 1992. Products made during IMC's occupation of the site included induction motors, fans and blowers, stepper motors and other rotating machines. Soils and groundwater at the site are contaminated with chlorinated hydrocarbons, petroleum hydrocarbons and metals. This site was listed on the Registry as a Class 2 site in 1995. Further investigations on this site revealed that the soils and groundwater were contaminated with chlorinated VOCs. Beginning in October 1997, IMC has operated a soil vapor extraction (SVE) system to remediate on-site soil contamination. The ROD for OU-1, On-Site Soil Contamination, incorporating the SVE system, was issued in January of 1998. A focused onsite groundwater RIFS at this site confirmed the presence of an on-site chlorinated VOC groundwater plume. The ROD for OU-2 On-Site Groundwater, was issued by NYSDEC in March 2000. The remedy selected

for groundwater remediation at this site is in-situ oxidation using hydrogen peroxide injection. Treatment began in December 2001 and is on-going. A soil vapor intrusion investigation is planned.

**Environmental Problems:** The primary contaminants of concern at the site known at this time include VOCs including PCE, and heavy metals such as chromium. The primary impact was to groundwater beneath the site and soils in the NW portion of the site. VOCs and metals at the site exceed SCGs.

**Health Problems Assessment:** There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards. Health Problem: impact was to groundwater beneath the site and soils in the NW portion of the site. VOCs and metals at this site exceed SCGs. There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards. Remediation of site-related source areas has reduced the level of VOCs in the raw water entering the Bowling Green wells. An air stripper was placed on the wells in 1995 to remove contaminants before water is distributed to customers. Strategies to further protect the impacted down-gradient supply wells are yet to be implemented.

Site Description: This site is located at 570 Main St. in the western part of the NCI. The site is a little over two acres, with one manufacturing building and a paved parking area covering most of the area. The site was occupied by IMC Magnetism Inc. from the early 1950s until 1992. Products made during IMC's occupation of the site included induction motors, fans and blowers, stepper motors and other rotating machines. Soils and groundwater at the site are contaminated with chlorinated hydrocarbons, petroleum hydrocarbons and metals. This site was listed on the Registry as a Class 2 site in 1995. Further investigations on this site revealed that the soils and groundwater were contaminated with chlorinated VOCs. Beginning in October 1997, IMC has operated a soil vapor extraction (SVE) system to remediate on-site soil contamination. The ROD for OU-1, On-Site Soil Contamination, incorporating the SVE system, was issued in January of 1998. A focused onsite groundwater RIFS at this site confirmed the presence of an on-site chlorinated VOC groundwater plume. The ROD for OU-2 On-Site Groundwater, was issued by NYSDEC in March 2000. The remedy selected for groundwater remediation at this site is in-situ oxidation using hydrogen peroxide injection. Treatment began in December 2001 and is on-going. A soil vapor intrusion investigation is planned.

**Actual:**  
**126 ft.**

**Site Description:** The site is located at 125 State Street in the central part of the NCI. The site is approximately one acre and is occupied by a two-story building. Tishcon Corporation was a tenant in this location from 1984 to 1996. Tishcon produced dietary supplements and vitamin products in the form of powders and tablets. The powders and tablets were produced in a dry blending process. From 1985 to 1993, the chemicals methylene chloride, 1,1,1-trichloroethane and methanol were used in the tablet coating process. Equipment used in the process was rinsed out in the driveway where the storm drains are located. Based on the presence of chlorinated VOCs and metals in four storm drains at the site, the NCDH requested that contaminated sediment be removed from storm drains and a distribution box on the property in August 1993. The site was placed on the Registry in 1995. The excavation and restoration of the contaminated source areas of two storm drains and a distributor was completed as an Interim Remedial Measure (IRM) in October 1997. The ROD for the site was issued in January of 1998 and required the excavation and restoration of the remaining contaminated source area. Excavation and disposal of this material was conducted in Spring of 1999. In March of 2000, the site was reclassified as a Class 4 site. Class 4 indicates that the site was properly closed and monitoring is required. A soil vapor intrusion investigation is planned.

**Environmental Problems:** The primary contaminants of concern are VOCs, of which, 1,1,1 TCA is found in exceedance of SCGs. The significant threat from contaminants at the site has been mitigated by the removal of the storm drain source areas and the subsequent reduction in groundwater contaminant levels.

**Health Problems Assessment:** There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards.  Record Upd: 2007-06-14 11:48:00  
 Updated By: GTBOBERS

Site Description: The 36 Sylvester Street site is located in the NCIA, an urban area in Nassau County, NY. The site is mostly occupied by a warehouse, with the remainder of the site being paved. This site is located on the east side of Sylvester Street, running to the west side of New York Avenue, south of Main Street in the New Cassel Industrial Area. The site is currently operated by GEL-TEC (a division of Tishcon Corp.), and formerly by National Gear Products. The building covers most of the lot, with the exception of alleys on the north and south sides of the lot, a small parking area on the southeast side of the lot, and a loading area on the east side. A soil sample collected from a leaching pool on the southeast side of the property exhibited trace amounts of 1,1,1-trichloroethane. Groundwater samples collected from this same location exhibited high concentrations of 1,1,1-trichloroethane. Past site operations have contaminated groundwater beneath and downgradient of this site with high levels of 1,1,1-trichloroethane (162 ppb - 3,235 ppb). The contaminated groundwater is located within an EPA-designated sole-source aquifer. Two public water supply wells are located approximately 1,500 feet downgradient of the site. These wells are currently being impacted by VOCs from the New Cassel Industrial Area. The NYSDEC and Grand Machinery entered into a RI/FS Consent Order in March 2000. The investigation took place from June 2001 to August 2001, and the RI report was finalized in September 2002. An IRM removing contaminated sediments from a dry-well located on the SW corner of the property was carried out in May 2002. End point samples showed that the contamination was successfully removed. VOC contamination remaining in on-site groundwater was attributed to two upgradient sites. A Record of Decision was signed in March 2003 specifying that no further action need be taken at the site.

Environmental Problems: There are no environmental problems associated with the disposal of hazardous waste remaining at this site. VOC contamination remaining in on-site groundwater is attributed to two upgradient sites.

Health Problems Assessment: There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards. Remediation of site-related source areas has reduced the level of VOCs in the raw water entering the Bowling Green wells. An air stripper was placed on the wells in 1995 to remove contaminants before water is distributed to customers. Strategies to further protect the impacted downgradient supply wells are yet to be implemented.

**Site Description:** The Tishcon site is located within the New Cassel Industrial area, an urban area in Nassau County, NY. The site is largely occupied by a warehouse style building, the remainder of the property is paved. This property is located between Sylvester Street and New York Avenue midway between Old Country Road and Main Street in the New Cassel Industrial Area. The Tishcon Corporation manufactures dietary supplements such as vitamins. Soft gelatin capsules are also manufactured by this company. As part of this process, a 1,1,1-trichloroethane (TCA) dip was used to remove mineral oil from the capsules. Approximately 4 drums of TCA were used per week. Sampling conducted on the property by a State consultant in December 1996 detected 180 ppm of TCA, 65 ppm of 1,1 DCA, 110 ppm of methylphenol and 3,900 ppm of Vitamin &quot;E&quot; in the on-site soils. This sample was collected from an open catch basin in the site parking lot. Past site operations have contaminated at least one dry well with high levels of volatile organics. The on-site contamination has impacted the underlying groundwater. This contaminated groundwater is located within an EPA designated sole-source aquifer. The contaminant plume that is partially emanating from this property has migrated approximately 1,000 feet downgradient. Two public supply wells are located approximately 1,500 feet downgradient. The PRP signed a Remedial Investigation/Feasibility Study (RI/FS) Consent Order. A final Remedial Investigation report was received in January 2000. Based on the results, an IRM was carried out to remove contaminated soil from an on-site dry well. A Proposed Remedial Action Plan (PRAP) has been issued which proposes no further action for the site. In August 2001, the on-site dry well was remediated. End point samples confirmed that the remaining soils were below clean-up levels. The remaining groundwater contamination is due to an upgradient source. A soil vapor intrusion investigation is planned for the summer of 2007.

**Environmental Problems:** The August 2001 Interim Remedial Measure successfully remediated this site. The remaining groundwater contamination is due to an upgradient source.

**Health Problems Assessment:** There are multiple groundwater contaminant plumes beneath the New Cassel

Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards. Remediation of site-related source areas has reduced the level of VOCs in the raw water entering the Bowling Green wells. An air stripper was placed on the wells in 1995 to remove contaminants before water is distributed to customers. Strategies to further protect the impacted downgradient supply wells are yet to be implemented.

Site Description: This site is located at 700-712 Main Street in the eastern part of the New Cassel Industrial Area (NCIA). The site is 0.85 acres, most of which is occupied by a single building. The remainder of the site is paved. The original building on this site was constructed in 1967. In 1975, Utility Manufacturing subletted part of the building. Utility Manufacturing has been the sole occupant in the building since February 1976. The Utility Manufacturing Company manufactures a variety of cleaning and lubricating products. A NYSDEC monitoring well sampling program and a PSA confirmed that soil and groundwater were contaminated with PCE and other related VOCs above standards and guidelines. Consequently, the NYSDEC listed the site as a Class 2 site in 1996. A subsequent field investigation was complete in May 1998 and included the collection of soil samples and installation and sampling of monitoring wells. The NYSDEC required Utility Manufacturing to conduct an additional investigation to delineate the on-site groundwater contamination (completed December 2000) and perform an IRM (AS/SVE) to remediate the on-site groundwater. The AS/SVE system was constructed and began operation in November 2001. A ROD for this site, calling for continued operation of the AS/SVE system and no further action, was signed in March 2003. After three years of post-remediation monitoring, the DEC has concluded that no further action is needed for on-site groundwater contamination. A State Superfund RI/FS began in July 2004 for OU-2, off-site contamination. Soil vapor and groundwater samples were obtained as part of the off-site RI. The results of the off-site RI delineated the migration of groundwater contamination from the site to Old Country Road. Contaminated soil vapor was detected above the groundwater contaminant plume. The off-site RI and FS Reports were issued in December 2005 and February 2006, respectively. A supplemental off-site RI is underway to determine if subsurface vapors have impacted properties in the vicinity of the

**AST:**

Facility ID: 001541  
Tank ID: 0034  
Tank Location: Indoors, Aboveground  
Capacity (Gal): 00005000  
Tank Status: In Service  
Tank Material: Fiberglass Reinforced Plastic  
Int Protection: None  
Ext Protection: PAINTED [e.g. asphaltic]  
Piping Type: Other  
Material Type: Waste  
Description: SODIUM HYDROXIDE  
Leak Detect: ELECTRONIC  
Containment: DOUBLE WALL TANK  
Product Gauge: Yes  
Dispense Method: Suction  
Fill Type: Pumped  
Install Date: 011996  
Owner Name: GENERAL SEMICONDUCTOR  
Owner Address: 172 SPRUCE ST  
Owner City,St,Zip: WESTBURY, NY 11590

Site Description: This site is located near the end of Frost Street at the eastern end of the New Cassel Industrial Area. The site contains one commercial/industrial building. The remainder of the site is paved. The surrounding proerties are also commercial and industrial. Former tenants, Autoline Automotive Corporation and National Bassen Textiles had documented use of degreasers and unknown chemicals, respectively. Two dry wells/cesspools are believed to have existed in the western portion of the site; Tetrachloroethylene (PCE) and 1,1,1-trichloroethane (TCA) related compounds were found in very high concentrations in the groundwater in this area of the site. Based upon the high downgradient versus upgradient groundwater levels of 1,1,1-trichloroethane and tetrachloroethylene and the high levels of both compounds found in the groundwater under the site, past disposal of hazardous waste is confirmed. The contaminated groundwater is located within an EPA designated sole-source aquifer. Thecontaminated plume that is emanating from this site has migrated and has impacted two public water supply wells, which are located

approximately 2,800 feet downgradient of the site. The field work for a state-funded Remedial Investigation/Feasibility Study (RI/FS) was completed in October 1998 and the report was dated August 1999. A ROD for Operable Unit 01-Soil was issued on March 30, 2000. Soil Vapor Extraction for the deep soil; Excavation and off-site disposal of surface soil; Removal of dry well sediments by vacuum truck for on-site soil were the selected remedies. The contaminated groundwater at the three Frost Street sites (Former Autoline Automotive, 89 Frost Street and Former Applied Fluidics) was the subject of a combined groundwater ROD for Operable Unit 02 issued on March 30, 2000. The selected remedies are Air Sparging/Soil Vapor Extraction near sources and In-well Vapor Stripping for Deep Groundwater contamination off site. A RD/RA Consent Order was executed in January 2003. Contaminated soil was excavated on-site in July 2003. The drywells were cleaned out in March 2004. The air sparge/soil vapor extraction design was completed in March 2005. Construction of the air sparge/soil vapor extraction system was completed in September 2005 and the system is currently running. The in-well vapor stripping system is in the design stage.

Environmental Problems: Tetrachloroethylene and 1,1,1-trichloroethane compounds attributable to the various activities at this site have contaminated the groundwater within a sole-source aquifer at and downgradient of the site. Contamination has migrated at least 2,800 feet downgradient and has impacted two public water supply wells.

Health Problems Assesment: There are multiple groundwater contaminant plumes beneath the New Cassel Industrial Area. Activities within the site have contributed to the groundwater contamination. The Bowling Green Public Water Supply Wells are located 300 to 500 yards down-gradient of the industrial area and are contaminated with levels of volatile organic compounds (VOCs) that exceed New York State drinking water standards. Remediation of site-related source areas has reduced the level of VOCs in the raw water entering the Bowling Green wells. An air stripper was placed on the wells in 1995 to remove contaminants before water is distributed to customers. Strategies to further protect the impacted downgradient supply wells are yet to be implemented.

 Site Description:

**Actual:**  
**99 ft.**

The Bartlett Tree Company consists of the original parcel of property (Lot 206), active and used by the company since the mid 1950s, plus a small strip of land running the length of the original property (Lot 786) on the west side purchased in the mid 1990s. The main building, a two-story brick and masonry structure, located at the south end of the site, is the office. Midway along the eastern side of the property are two adjoining buildings: a garage where large equipment is stored and, to the north, a fireproof shed with concrete floor where the pesticides are stored. At the north end of the property is a one-sided open shed where large mechanical equipment is stored. In 1990, the Region 1 office received an anonymous phone call reporting that pesticides were dumped into a dry well at the site. Specific pesticides and herbicides were named, including Malathion, DDT, Sevin, chlordane and lead spray for fruits. It was reported that from the mid 1950s until 1983 between 200 and 300 gallons of spray were periodically dumped into the dry well. The dry well was then allegedly filled with empty 5-gallon metal pesticide containers, covered with a metal manhole cover and paved over with asphalt. Previously, in 1987, representatives from Bartlett Tree Expert Company visited this site to investigate a 1987 report of an abandoned "cistern"; that held empty pesticide containers. They found that the cistern was partially filled with water which they sampled and two pesticide containers (empty, crushed 5-gallon metal pails of Sevin). The herbicide diazinon was detected in the sample of standing water taken at a concentration of 0.61 ppm. Based on these results, the company determined that "the residue levels detected did not represent a level that could be considered harmful to human health or the environment." After their inspection, they had the dry well backfilled with sand. A PSA was performed in 1996 which revealed that eight different pesticides were found beneath the dry well at levels that exceed the NYS Part 703 Class GA Groundwater Standards. Several chlorinated solvents (DCE, TCE, PCE) were found both upgradient and downgradient of the site, suggesting an

Environmental Problems: off-site source. An RI/FS is planned. Groundwater samples taken from the shallow aquifer at dry well DW-1 were found to be contaminated with pesticides that exceed NYSDEC Class GA groundwater standards. Soil samples taken from under DW-1 were found to be contaminated with the same pesticides as found in the groundwater. This site lies over a sole-source aquifer.

Health Problems Assessment: Groundwater at the site is contaminated with pesticides in a relatively localized area. There are no known users of groundwater in the immediate vicinity. Residual contamination is beneath the surface; therefore, exposure to site contaminants is not expected for the on-site workers.

## EPA Waste Codes Addendum

Code	Description
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D009	MERCURY

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **FEDERAL RECORDS**

### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/09/2007	Source: EPA
Date Data Arrived at EDR: 09/05/2007	Telephone: N/A

Number of Days to Update: 56	Next Scheduled EDR Contact: 02/18/2008
	Data Release Frequency: No Update Planned

## **CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007	Source: EPA
Date Data Arrived at EDR: 06/20/2007	Telephone: 703-412-9810
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 12/06/2007
Number of Days to Update: 70	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Quarterly

## **CERCLIS-NFRAP:** CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007	Source: EPA
Date Data Arrived at EDR: 07/23/2007	Telephone: 703-412-9810
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 12/06/2007
Number of Days to Update: 37	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Quarterly

## **CORRACTS:** Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/26/2007	Source: EPA
Date Data Arrived at EDR: 08/08/2007	Telephone: 800-424-9346
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 12/03/2007
Number of Days to Update: 21	Next Scheduled EDR Contact: 03/03/2008
	Data Release Frequency: Quarterly

## **RCRA:** Resource Conservation and Recovery Act Information

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: (212) 637-3660
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 12/21/2007
Number of Days to Update: 56	Next Scheduled EDR Contact: 02/18/2008
	Data Release Frequency: Quarterly

## **ERNS:** Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/24/2007	Telephone: 202-267-2180
Date Made Active in Reports: 03/12/2007	Last EDR Contact: 10/19/2007
Number of Days to Update: 47	Next Scheduled EDR Contact: 01/21/2008
	Data Release Frequency: Annually

## **HMIRS:** Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 07/02/2007	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 07/18/2007	Telephone: 202-366-4555
Date Made Active in Reports: 09/18/2007	Last EDR Contact: 10/16/2007
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/14/2008
	Data Release Frequency: Annually

## **US ENG CONTROLS:** Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/16/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/03/2007	Telephone: 703-603-8905
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 11/16/2007
Number of Days to Update: 69	Next Scheduled EDR Contact: 12/31/2007
	Data Release Frequency: Varies

## **US INST CONTROL:** Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/16/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/03/2007	Telephone: 703-603-8905
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 11/16/2007
Number of Days to Update: 69	Next Scheduled EDR Contact: 12/31/2007
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **DOD:** Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 703-692-8801
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 11/09/2007
Number of Days to Update: 62	Next Scheduled EDR Contact: 02/04/2008
	Data Release Frequency: Semi-Annually

## **FUDS:** Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2006	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 08/31/2007	Telephone: 202-528-4285
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 10/01/2007
Number of Days to Update: 41	Next Scheduled EDR Contact: 12/31/2007
	Data Release Frequency: Varies

## **US BROWNFIELDS:** A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 06/20/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/09/2007	Telephone: 202-566-2777
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 12/13/2007
Number of Days to Update: 51	Next Scheduled EDR Contact: 03/10/2008
	Data Release Frequency: Semi-Annually

## **CONSENT:** Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 04/13/2007	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 07/16/2007	Telephone: Varies
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 09/21/2007
Number of Days to Update: 44	Next Scheduled EDR Contact: 01/21/2008
	Data Release Frequency: Varies

## **ROD:** Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 06/08/2007	Source: EPA
Date Data Arrived at EDR: 07/03/2007	Telephone: 703-416-0223
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 11/08/2007
Number of Days to Update: 57	Next Scheduled EDR Contact: 12/31/2007
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **UMTRA:** Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 12/31/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/08/2006	Telephone: 505-845-0011
Date Made Active in Reports: 01/29/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 82	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Varies

## **ODI:** Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **TRIS:** Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2005	Source: EPA
Date Data Arrived at EDR: 04/27/2007	Telephone: 202-566-0250
Date Made Active in Reports: 07/05/2007	Last EDR Contact: 12/18/2007
Number of Days to Update: 69	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Annually

## **TSCA:** Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 11/14/2007
Number of Days to Update: 46	Next Scheduled EDR Contact: 01/14/2008
	Data Release Frequency: Every 4 Years

## **FTTS:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 07/06/2007	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 07/20/2007	Telephone: 202-566-1667
Date Made Active in Reports: 09/18/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 60	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Quarterly

## **FTTS INSP:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act) A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 07/06/2007	Source: EPA
Date Data Arrived at EDR: 07/20/2007	Telephone: 202-566-1667
Date Made Active in Reports: 09/18/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 60	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **SSTS:** Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005	Source: EPA
Date Data Arrived at EDR: 03/13/2007	Telephone: 202-564-4203
Date Made Active in Reports: 04/27/2007	Last EDR Contact: 10/15/2007
Number of Days to Update: 45	Next Scheduled EDR Contact: 01/14/2008
	Data Release Frequency: Annually

## **LUCIS:** Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 12/10/2007
Number of Days to Update: 31	Next Scheduled EDR Contact: 03/10/2008
	Data Release Frequency: Varies

## **DOT OPS:** Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 08/14/2007	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 08/29/2007	Telephone: 202-366-4595
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 11/29/2007
Number of Days to Update: 43	Next Scheduled EDR Contact: 02/25/2008
	Data Release Frequency: Varies

## **ICIS:** Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 07/27/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/13/2007	Telephone: 202-564-5088
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 10/15/2007
Number of Days to Update: 59	Next Scheduled EDR Contact: 01/14/2008
	Data Release Frequency: Quarterly

## **DEBRIS REGION 9:** Torres Martinez Reservation Illegal Dump Site Locations

A listing of illegal dump sites location on the Torres Martinez Indian Reservation located in eastern Riverside County and northern Imperial County, California.

Date of Government Version: 07/25/2007	Source: EPA, Region 9
Date Data Arrived at EDR: 07/31/2007	Telephone: 415-972-3336
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 12/26/2007
Number of Days to Update: 72	Next Scheduled EDR Contact: 03/24/2008
	Data Release Frequency: Varies

## **HIST FTTS:** FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## **CDL:** Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## **RAATS:** RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## STATE AND LOCAL RECORDS

### **HSWDS:** Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003

## **HIST SPILLS:** SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

	Data Release Frequency: Quarterly

## **VCP:** Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 08/15/2007	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 09/12/2007	Telephone: 518-402-9711

## **SPDES:** State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

## **E DESIGNATION:** E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

## **RES DECL:** Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

Data Release Frequency: Varies

## **EDR PROPRIETARY RECORDS**

### **Manufactured Gas Plants:** EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

South Map:	40073-F5 FREEPORT, NY
Most Recent Revision:	1979

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u> NASSAU, NY	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
---	--

Flood Plain Panel at Target Property: 36059C0139F

Additional Panels in search area: 36059C0143F  
36059C0231F  
36059C0227F

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> HICKSVILLE	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles ENE
Site Name:	Air Techniques, Inc
Site EPA ID Number:	NYD043835081
Groundwater Flow Direction:	GENERALLY S.
Inferred Depth to Water:	approximately 60 feet.
Hydraulic Connection:	Clay members separate aquifers underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

Era: Cenozoic  
System: Quaternary  
Series: Pleistocene  
Code: Qp (decoded above as Era, System & Series)

### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION

<u>DATABASE</u>	<u>SEARCH DISTANCE (miles)</u>

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### **USGS 7.5' Digital Elevation Model (DEM)**

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### **Scanned Digital USGS 7.5' Topographic Map (DRG)**

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### **State Wetlands Data: Freshwater Wetlands**

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### **AQUIFLOW<sup>R</sup> Information System**

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### **Geologic Age and Rock Stratigraphic Unit**

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **STATSGO: State Soil Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### **SSURGO: Soil Survey Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### **PWS:** Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### **PWS ENF:** Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### **USGS Water Wells:** USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### RADON

#### **State Database: NY Radon**

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### **Area Radon Information**

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### **EPA Radon Zones**

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### **Airport Landing Facilities:** Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### **Epicenters:** World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Re: Property  
252 Grand Street E.  
Westbury

Dear Caroline A. Cadalso:

In accordance with your request for records concerning the above referenced property under the Freedom of Information Law, the Bureau of Environmental Protection has reviewed its records and no files were found to exist in this Bureau.

Please contact me (516) 571-3314 if you have any questions concerning this file search.

Very truly yours,

Elizabeth Jean-Francois  
Bureau of Environmental Protection

RESUMES OF ENVIRONMENTAL PROFESSIONALS

## CAROLINE A. CADALSO

Senior Project Scientist

### PROFESSIONAL EXPERIENCE

H2M (2007 to Present)

A.C.T. (2004-2007; 1991-1994)

GZA GeoEnvironmental Inc. (2001-2004)

Environmental Planning and Management (1997-2001)

Roy F. Weston (1994-1997)

### EDUCATION

M.S., Hydrogeology, State University of New York at Stony Brook, 2000

B.S., Geology, State University of New York at Cortland, 1990

### CERTIFICATIONS

Certified Health and Safety Operations at Hazardous Waste Sites (OSHA)

Hazmat Supervisor (OSHA)

### MEMBERSHIPS

Long Island Association of Professional Geologists

Ms. Cadalso has over 13 years of diverse experience in the environmental consulting industry. She has performed and managed projects throughout the New York City metropolitan area. These projects have ranged from Phase I Environmental Site Assessments and Phase II Site Investigations at commercial and industrial sites. In addition, Ms. Cadalso has extensive experience documenting the closure of underground storage tank facilities for commercial and industrial clients. Other projects she has been involved with include aquifer studies, third party reviews, and regulatory compliance audits.

Select project experience includes:

- Managed and conducted Phase I and Phase II Environmental Site Assessments throughout New York City and Long Island for commercial and industrial facilities. Prepared sampling plans for soil, groundwater, soil vapor and indoor air.
- Responsible for preparation of Remedial Action Plans for New York City developers. The objectives were to address the requirements of the New York City Department of Environmental Protection by providing recommendations for corrective action, specifically including an evaluation of remedial alternatives including tank removal, excavation of contaminated soils, and encapsulation.
- Project Manager for the oversight of underground storage tank (UST) closure activities conducted by the client's remediation contractors. This involved ensuring that the UST closures were conducted in accordance with state and local regulations as well as the construction specifications and health and safety plan.
- Assisted in preparation of Application Summary and Variance Report, the carrier document for the Fresh Kills Landfill permit application. Developed arguments for required variances and equivalency arguments based on the provisions of 6NYCRR Part 360 regulations. Provided technical assistance regarding hydrogeologic evaluations of the landfill for Part 360 closure.
- Conducted landfill investigations to evaluate remedial alternatives as per NYSDEC guidelines. Alternatives were evaluated on the basis of technical practicality, environmental protection and cost.
- Senior Scientist for NYS Department of Transportation contract. Coordinated and conducted highway and bridge corridor studies to determine the potential for the presence of contaminated soil and groundwater during construction and rehabilitation of bridges and roads. Submittals provided recommendations on soil disposal and health and safety guidelines in accordance with Chapter 5.1 of the NYS DOT requirements for environmental studies.
- Geologist for an extensive soil and groundwater contamination study at a historical arsenal. Involved contractor oversight, environmental data management, designing shallow overburden, deep overburden, and bedrock monitoring wells, and clearance for drilling.
